

## DATA SHEET

# Selekt™ Balance

**Presentation** A white powder. Each sachet of 400 grammes contains the following ingredients.

Dextrose monohydrate .....	175 g
Sodium chloride.....	155 g
Potassium chloride .....	50 g
Calcium propionate .....	16 g
Magnesium sulphate 7-hydrate.....	4 g

**Uses** For rehydration of cows, ewes and horses.

**Instructions for use** Selekt™ Balance should be dissolved in warm water at a rate of one 400-gramme sachet in 20 litres.  
**Adult cattle and ewes** The volume of a solution of Selekt™ Balance given to dehydrated cattle and ewes should be equivalent to at least 3% of their bodyweight. This is typically 20 litres for a cow and 0.5 litre/10 kg bodyweight for a sheep. More seriously dehydrated animals require larger volumes. Selekt™ Balance is palatable to most animals, so they will drink it. However, for rapid rehydration, it should be delivered into the rumen with Selekt™ pump-drencher.  
**Horses** Offer a solution of Selekt™ Balance instead of plain drinking water.

**Contra-indications and warnings** Do not use less than 20 litres to dissolve the contents of the sachet.

**Legal category** Complementary feeding stuff

**Package quantity** Box containing 12 x 400 grammes

**Marketed by** Nimrod Veterinary Products Ltd  
25a, High Street
