**Concerning absence of certain substances in Dryflex® 500600S**

- BPA Bisphenol A
- Phtalates

The above mentioned substances are not added intentionally in the production process nor expected to be generated during the manufacturing process. No polymers based on BPA are used as raw material. To the best of our knowledge Dryflex 500600S does not contain any of these substances.

This statement is based on knowledge of raw material and has not been verified by tests.

Best regards

Anneli Gordon | Quality and EHS Manager
