

Milk Bar™ 1 Adjustalock

Product Code: 910102

The Milk Bar™ 1 Adjustalock secures both the Milk Bar™ 1 and the Milk Bar™ 1 4L to gates. These feeders have moulded hooks which can crack if forced onto wide rails, but when they are hung from the perfect width, there is no stress to the hooks to increase feeder longevity!

Simple and fast to install you can secure the Adjustalock at any height, making sure the teat is at the right height for better calf performance.

How to use

Easy to install, the Adjustalock is secured to either vertical or horizontal gate bars.

To give your calves the best drinking position, secure the Milk Bar™ Adjustalock to your gate at around 80cm high. When the feeder is hung on the Adjustalock, the teat is at 60cm which is the optimum height for calves and helps the oesophageal groove to close.

Cleaning

Periodically clean with an Alkali detergent to remove any build up of milk fat and protein.

FAQs

Warranty: The Adjustalock has a two year warranty with proof of purchase. The warranty does not apply to consumable parts (bolts). Made from food grade polyethylene and U. V Stabilised for long life.

The Adjustalock attached to any type of gate to secure the Milk Bar™ 1 and Milk Bar™ 1 4L at the perfect height!
