

B.I.O.Tox®

Identification:

PREMIX

Product description:

Premix with high content of binding substances

Animal category:

Ruminants, poultry and pigs

Additives/kg:

Binders:

Bentonite (1m558i) 431 250 mg

Sepiolite (1g562) 56 000 mg

Substances for reduction of the contamination of feed by mycotoxins:

Bentonite (1m558) 421 000 mg

Carrier:

12.1.12 Yeasts products, 7.13.1 Vegetal carbon (charcoal)

Recommended dosage:

0.5 – 3.0 kg/ton of final feed

For dairy cows: 10 – 60 g/cow/day

Required dosage depends on several parameters including status of feed contamination, feed quality, animal species, animal age, health status, etc.

In order to obtain maximum efficacy, mix B.I.O.Tox® thoroughly while loading raw materials and/or feeds.

Characteristics:

Grey, odourless powder

Light variations in color do not affect product quality.

Feeding advice:

The simultaneous oral use with macrolides shall be avoided. For poultry the simultaneous use of robenidine shall be avoided as well.

Shelf life:

24 months after manufacturing date when stored under dry conditions in original packaging.

Store in a well-ventilated area.

Package size:

25 kg bag

Version: 05

Issued: 05/2025
